- PHP- CodeIgniter
- Xamarin Forms
- ASP.net core web api

Skills

- Technical support
- Team work
- Ability to work under pressure
- Leadership
- Time management
- Self-Motivation

Graduation Projects

- Smart Lighting System -Graduation Project, my idea is a smart bulb, it has several characteristics: -Control lighting intensity and the possibility of change based on certain calculations ranging between the highest light and low light. Control will be in one of two ways either remote control or mobile application.
The possibility of changing the color of light. - Turn on and turn off the light based on the presence of motion in place using a Motion sensor.
Predicting the presence of fire inside the place in two ways either by bell or by blinking.
